

Calvin Doval

Introduction

I'm Calvin Doval, a banjo player, rugby enthusiast and Blizzard Entertainment fan.

Currently I am helping UC Davis improve its online presence through website and application development and design.

Previously I helped a number of startups develop their brand, websites and mobile applications.

In 2012 I began teaching myself how to make a website which culminated in two jobs in the field. From there I began learning design and UX philosophy which I continue to pursue.
